## Module 6

Putra Dharma Bangsa – 1301180523,

Naufal Xeela P – 1301194177,

Meizan Arthur Alfianto – 1301194178,

Andi Achmad Adjie – 1301194264

1. a. Choose a DBMS software to implement your software's database; Explain the reason for choosing it.

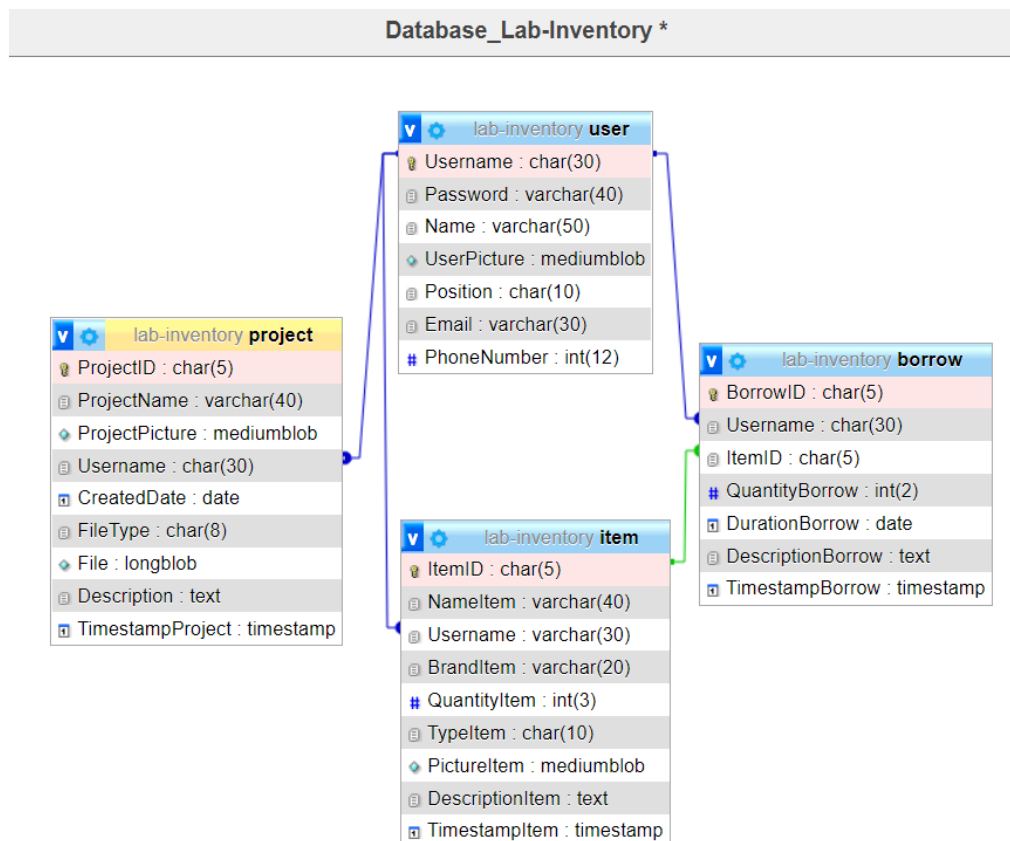

b. Download the chosen DBMS; install it.

2. Implement your database tables design (from Preliminary Task) using the installed DBMS. Present your result at the end of practicum.

Answer

1.A. We choose MySQL as our DBMS and phpMyAdmin to handle the administration of MySQL over the web, because it is commonly used so it is easier to find a tutorial to use it and phpMyAdmin uses web user interface so it's more convenient for us.

B. MySQL(PhpMyAdmin)

2.
